Art Unit: 3729

Applicants' response to the Office's Restriction Requirement which was mailed on or about 05 July 2005 has been duly noted but is held not to obviate the Restriction for at least the following reason; Applicants urge *inter alia* that since Claim 18 explicitly recites an integrated circuit having the wire bonds by the method of Claim 1 that one must adhere or read this limitation into claim 18. It is the understanding of the Examiner or the Office that this statement by Applicants is inaccurate and that the Office need not consider a process limitation (such as recited in claim 18) when examination is being made of product claims. Moreover as pointed out in the Office's Restriction the Group III invention is unnecessary for performing the Group I and Group II inventions. It is held therefore that the Restriction which was mailed on or about 05 July 2005 was and continues to be proper. In view of this holding the Restriction requirement is hereby **made Final**. Applicants therefore are required to cancel all non-elected claims or take other appropriate action.

An Office Action on the merits of claims 1-17 follows.

This application is in condition for allowance except for the following formal matters:

Applicants are required to cancel all non-elected claims; furthermore Applicants are requested to amend the Title of this Application to reflect the no claimed invention e.g. Method of Performing a Wire Bonding Operation—or the like; In the initial page of the Specification Applicants are required to provide all U.S. Patent Office Serial numbers of the related Patent Application which are related to the instant Applications or alternatively delete any mention of these "related Applications".

Art Unit: 3729
